

# My POS did not get DEX, should I get an accurate meter value?

A machine with NO DEX will still give an accurate meter value

To double check this calculation,

Meter O/S = (Counted cash + Cashless DEX sales) - (Estimated total sales) - (Product O/S)

Meter O/S = (23.75 + 1.00) - 16.00 - (5.75)

Meter O/S = 3.00
