

Global Report: Bring Backs

An upgraded version of the Driver Checkin Bring Back Report

- Users can run this report with or without a route filter
- We increased the available date range to view past bring back data
- Grouped by Visit Date > Route > Product Family > Product Code
- Why we made this change:
 - Users are quickly able to verify the expected quantity of product route drivers should have after completing their visits
 - Compare the amount picked to visit adds for each product
 - Track quantities of products spoiled/removed
