

# What is the difference between a title and a code in Gimme?

Both a code and a title can be assigned to a specific POS, product, account, etc.

A **title** is essentially a nickname for the POS. You can base the title on the POS location (address or company name) or anything which could help you remember the specifics of the POS.

A **code** is used for tracking throughout the software. It cannot be duplicated. Assigning a code helps differentiate it unlike a title. That is why it's important to send the code for the POS, products, accounts, etc. when contacting support.

To **add or edit a code and/or a title**, go to the **Accounts** page by clicking the three lines in the top left corner. From here, you will enter the POS to which you want to add or edit a code. Click the **three red dots in a white circle** on the far right of the POS description. Click **Edit Location**. Add or edit the code and/or title.
