

Upload or gRPC error

A gRPC error can vary from a loss of network connection (most common) to an operation failure in Gimme's software.

First:

- Try performing the operation again. If this is still not successful, check your network connection and close and reopen the Gimme app.

If the gRPC error is still appearing:

- Take a screenshot of the error
- Send the steps you took to get to the error, along with the screenshot to support@gimmevending.com
