

Future delivery invoices

Users cannot view future delivery invoices in Gimme VMS.

However, if you

1. pick for delivery POS types (prekit toggle is on for the delivery POS
2. the standing order is added to the POS, users can see the pick list for a future delivery once the pick order is generated.

1. Use the calendar to navigate to the day of the delivery.
2. Use the search field to search for the delivery POS you want to view.
3. Click on the delivery POS to open the Visit Details page
4. You may change the products, prices, and quantities on the Visit Details page.

***For scheduled deliveries and one time deliveries, you may see the future invoices but can not print the invoice until after the delivery is complete.**

If you do not know the delivery date, you may find this on the Schedule page.

1. Use the red POS search field to search for the delivery POS
2. Select the delivery POS and click "**Next.**"

***This is for scheduled deliveries only. One-time invoices created from the create delivery feature can not be found this way.**
