

Receiving warehouse deliveries

Warehouse products can be received two different ways:

1. In VMS: Creating a New Receipt on the Receipts tab of the Warehouses screen
2. In Gimme Field: Receive Items from the Warehouses screen (creates a receipt in VMS)

Both ways can be completed using an In-Progress Purchase Order as a basis for the products received and will create a receipt in VMS, which adds to the on-hand quantity in the warehouse.
